Important Information for the 35th Environmental Permitting Summer School

The Exhibit Hall: The exhibit hall is located across from the registration desk and will be open between sessions beginning at 10:10 am on Wednesday, 7/21. All breaks, continental breakfasts, and the reception will be held in the Exhibit Hall to give you an opportunity to visit with our exhibitors and sponsors.

Name Badges: Please wear your name badges so that you can be identified as being with the conference. If you lose your name badge there will be a \$10 fee to replace. Same goes for the meal tickets – we cannot allow attendance at the lunches without your meal ticket.

Lunch: A complimentary lunch is provided to conference participants on Wednesday (7/21) and Thursday (7/22) in the Banyan Ballroom. To receive this lunch, participants **MUST** bring the lunch tickets that were included in your welcome packet. These lunches are for conference participants only and will not be open to the public.

T-Shirts: Each conference registration packet includes one coupon redeemable for a 35th annual EPSS T-shirt. Please write your first and last name on the back and bring your coupon to the registration desk between 2:00 pm on Wednesday (7/21) and 11:00 a.m. on Thursday (7/22) to get your t-shirt and be entered into a drawing for a two night/three day stay at the JW Marriott Marco Island and other prizes supplied by our sponsors and exhibitors. (T-shirts are available for pick up until 10:00 am on Friday. Sizes and t-shirts themselves are limited and available on a first come, first serve basis.)

Our featured artist this year is Becky Walter Hoppe. As a born and raised Floridian, her love of nature and wildlife surrounding her hometown of Tallahassee, Florida, has brought her many gifts. One being the love to capture and create scenes of the Florida coast, as well as the fish and sea creatures inhabiting the shoreline. Her family has enjoyed countless saltwater inshore fishing adventures. These outings have helped her create this year's art for the conference. Becky especially loves to create and design original artwork specific to client's spaces. For further information about Becky's artwork or to commission a painting, please email her at bhoppegirl@gmail.com.

Welcome Reception: A reception will be held Wednesday night (7/21) from 5:30 to 6:30 p.m. in the Exhibit Hall. A drink ticket is included in your welcome packet for one free drink, after that it's a cash bar.

Continuing Education Credits: Registered conference attendees may be eligible for continuing education credits. For information on obtaining professional credits for lawyers, engineers, and others please refer to page 38.

Course Materials: The presentation materials used in your classes were produced by our course instructors and will be made available following the conference on our dedicated page at <https://epss2021.sched.com/>. The download links will be located on each course page underneath the speakers. You must use your personal login credentials that you established when you signed up for your courses. Contact us if you need assistance.

KEYNOTE SPEAKER

Adam Blalock - Deputy Secretary for Ecosystems Restoration, Florida Department of Environmental Protection

Adam Blalock is responsible for overseeing statewide water supply; restoring and protecting Florida's aquatic ecosystems including the Everglades; managing aquatic research, monitoring and laboratory analysis; funding water and wastewater infrastructure; and governing coastal protection and resiliency.

Prior to joining DEP, Adam worked at Hopping, Green & Sams, specializing in natural resource legislation and environmental permitting on the local, state and national levels. Adam also has a wealth of experience in public environmental law, serving first as an attorney and later as the policy chief for the Agriculture and Natural Resources Subcommittee of the Florida House of Representatives from 2005 to 2015. In addition to his legal experience, Adam holds a Juris Doctor and master's degree in Environmental Law and Policy from the Vermont Law School and a bachelor's degree in Political Science from the University of Florida.

CONFERENCE MODERATOR

Frank Walker - Vice President of Governmental Affairs, Florida Chamber of Commerce

Frank Walker serves as Vice President of Governmental Affairs of Florida's largest and most influential business advocacy organization, the Florida Chamber of Commerce. Frank manages the development and strategic implementation of the Chamber's annual legislative agenda, the Florida Business Agenda, and leads the Chamber's team of 20 lobbyists.

Prior to joining the Chamber, Frank spent nearly 11 years in Washington, D.C. serving two Members of Congress, two U.S. Senators and a sitting Governor. Having most recently served as Chief of Staff to U.S. Representative Daniel Webster, Walker also held key policy and leadership positions with former Senator George LeMieux, Representative Dave Reichert, and former Senator Mel Martinez.

Frank's policy work included advising Members on energy and natural resources, environment, agriculture and transportation. He also brings an understanding of congressional parliamentary procedure after serving as an Associate to the House Rules Committee.

Additionally, Frank has served on multiple successful congressional campaigns, including campaigns for Webster, Reichert, former Representative Steve Southerland and U.S. Senator Bob Corker.

Frank was raised in Tallahassee, Florida, where he went to Maclay School. He graduated from Davidson College in Davidson, North Carolina, with a B.A. in History and a scratch handicap. After college he moved to Kanazawa, Japan to teach English through the Japanese Exchange Teaching (JET) program before returning home and heading to our nation's capital.

Frank and his wife, Katie, reside in Tallahassee with their two daughters.

32nd Annual Environmental Permitting Summer School

Sponsors

PLATINUM SPONSORS

[GREENBERG TRAURIG, LLP](#) Greenberg Traurig's environmental and land development practices comprise an integrated network of professionals in 40 offices in the United States, Latin America, Europe, the Middle East and Asia, including six offices in Florida. Our team is nationally recognized for experience in a number of areas, including permitting, auditing and compliance, brownfield development and risk transfer, natural resources, Native American law, and a broad range of environmental, toxic tort, and government enforcement litigation (administrative, civil, and criminal). GT regularly assists clients with a wide variety of land development issues, including navigating the complexities of Florida's growth management laws and policies. The firm's environmental professionals work closely with the firm's land development, real estate, corporate, energy, and other transactional lawyers and have significant experience in key industry sectors, including: mining, oil and gas, transportation, agriculture, waste management, electricity generation, renewables and clean technology, pulp and paper, steel and other metals, chemicals, pharmaceuticals, and real estate. GT's results-oriented and practical approach to problem solving has led major national and international companies and other organizations to entrust the firm with their most challenging environmental and land development matters. For additional information, please visit www.gtlaw.com.

[GUNSTER](#) Gunster's Environmental, Land Use & Property Rights practice guides clients through Florida's complex environmental permitting and regulatory landscape and defends owner's rights as necessary. Our attorneys represent public and private entities, both national and international, who own, lease, develop, finance and manage properties throughout Florida and the United States, including agricultural, commercial, energy, industrial, residential, retail, and mixed-use properties. Gunster's environmental practice brings together real estate, land use, environmental and property litigation attorneys, staff and in-house planners. Our lawyers include Florida Bar certified attorneys who provide counsel and representation before state and federal environmental agencies on all aspects of water resource permitting, water use and water supply, air quality and emissions, water quality permitting including NPDES, Everglades restoration matters, listed species permitting, and issues related to state and federal administrative law. Gunster attorneys are regularly featured authors and speakers at seminars and conferences throughout Florida. Additionally, they are involved with related organizations including the American Water Resources Association, the American Water Works Association, Florida Bar Environmental and Land Use Law Sections, the Florida Bar Property Rights Committee, the Florida Green Building Coalition and U.S. Green Building Council, the American Planning Association, ULI, NAIOP, and ICSC. For more information, visit gunster.com.

[HOLLAND & KNIGHT](#) is a global law firm with more than 1,400 lawyers and professionals located in 24 U.S. offices – including Fort Lauderdale, Jacksonville, Lakeland, Miami, Orlando, Tallahassee, Tampa and West Palm Beach – as well as Bogotá, London and Mexico City. As one of the largest law firms in Florida and in the United States, we have extensive experience and knowledge in all aspects of environmental law, from acquisitions and project development to environmental audits and compliance assessments, as well as litigation and enforcement defense. Our Florida Environmental Team attorneys have a long history and substantial experience with environmental issues such as air, water, due diligence, entitlements, brownfields, wetlands, endangered species, health and safety, hazardous and solid waste, and related litigation. With a solid track record, industry connections and leadership, Holland & Knight is frequently recognized by leading industry groups and publications. The U.S. News – Best Lawyers® “Best Law Firms” guide selected our firm for national first-tier rankings in both Land Use & Zoning Law and Environmental Law each year from 2015 to 2020, as well as 2020 metropolitan first-tier rankings in Environmental Law (Miami, Orlando, Tallahassee) and Litigation – Environmental (Jacksonville, Orlando, Tallahassee). It also honored Holland & Knight as “2019 Law Firm of the Year” in Land Use and Zoning Law.

[HOPPING GREEN & SAMS, P.A.](#) is a Florida-based law firm representing clients across the state and beyond in a wide range of matters, with focuses that include: land use, property rights, and development; environmental regulation, permitting, and litigation; and government and legislative affairs. Chambers and Partners has recognized HGS as a “market-leading Tallahassee boutique, recognized for its broad expertise in environmental work” that is also “noted for its strength in the government relations space” and known for “extensive experience representing landowners and developers before local and state government authorities in relation to land use and zoning matters.” HGS’s attorneys have experience assisting clients at federal, state, regional, and local levels in connection with: solid and hazardous waste, comprehensive planning, real estate, property rights, toxic substances, wetlands, water use, sovereign submerged lands, air emissions, underground injection control, oil and gas exploration, endangered species, industrial wastewater, domestic wastewater, stormwater, and potable water. With offices two blocks from the Florida Capitol, HGS also maintains a robust government and legislative affairs practice crafting solutions to client problems before the Florida Legislature, state agencies, and the Governor and Cabinet. HGS is also well-known for its special taxing districts practice, representing clients in matters related to the formation and operation of districts and the public finance of infrastructure and other improvements.

[MANSON BOLVES DONALDSON VARN, PA](#) is a Florida based law firm with public and private clients ranging from large, multi-billion dollar interests to start ups. The firm focuses on water, environmental, administrative and governmental law as well as business, contracting and construction. Manson Bolves offers a full range of services, from siting and permitting through mediation or litigation. In addition, our legislative practice represents clients with local, regional and state bodies. We assist our clients by negotiating with state and local agencies, and navigating issues through the complex, and sometimes conflicting, governmental process. Manson Bolves also provides representation for clients on transactions between governments and private interests, including the negotiation and drafting of interlocal agreements. Our understanding of government provides a unique perspective for our private sector clients. The processes, the personalities and the policies that move or stall good projects can sometimes be a mystery to our private sector clients. We can untangle the mysteries of those processes and help ensure fair and equitable treatment under the laws, rules and regulations. Likewise, the commercial and construction litigation team at Manson Bolves ensures that clients are properly represented in contractual and related business disputes. While government is complex, a seemingly endless array of mishaps, misunderstandings and mistakes plague the industry. We represent our clients’ interests. From contracting through court we have been called upon to ensure our clients get what they need, what they deserve, what they are entitled to. For additional information, please visit www.mansonbolves.com.

[STEARNS WEAVER MILLER](#) is a full service law firm with offices in Miami, Fort Lauderdale, Tampa, Tallahassee and Coral Gables. Our Land Development, Zoning and Environmental Department is a statewide practice group focused primarily on the Florida marketplace. This focus enables us to understand Florida’s political, business and development trends at the state, regional and local government levels, and effectively represent and serve our clients throughout all regions of Florida. Our team provides our clients an array of legal and planning services related to transactions, land use entitlements, land development, and environmental matters, as well as governmental affairs representation and litigation related to those practice areas. We represent clients at federal, state, regional, and local levels on a broad range of environmental and land use issues involving wetlands, coastal development, greenfields, comprehensive plan amendments, protected species and habitat, property rights, water quality, brownfields, rezoning, contaminated sites, sovereign submerged lands, marinas/docking facilities, due diligence reviews, water use, developments of regional impact, toxic torts, utilities, stormwater management, beach nourishment, variances, platting, transfer of development rights, and climate change/coastal resilience. Our Department brings together land use, environmental, property rights, and litigation attorneys, in-house planners, and GIS mapping staff. We have strategically built our practice group to include attorneys and planners from many different professional disciplines, each providing unique assets for our clients. Our team includes attorneys previously serving as in-house counsel for corporations and industry groups, as well as attorneys and planners who formerly held high-level positions with major local governments and regional and state

agencies – this diversity brings multiple perspectives to the table which enables creative problem solving, and results in practical advice to our clients. For additional information, please visit www.stearnsweaver.com.

GOLD SPONSORS

[AKERMAN LLP](#) Akerman is a top 100 U.S. law firm recognized among the most forward thinking firms in the industry by *Financial Times*. Its more than 700 lawyers and business professionals collaborate with the world's most successful enterprises and entrepreneurs to navigate change, seize opportunities, and help drive innovation and growth. We are recognized for substantial experience in complex transactions, development and construction projects, economic development incentives, environmental matters, public private initiatives, and litigation. Ranked by *U.S. News – Best Lawyers* as a national tier one law firm for Environmental Law, Akerman's Environment and Natural Resources team advises businesses on nearly every kind of environmental regulatory challenge they might face. We represent Fortune 500 companies, publicly traded REITs, developers, and other public and private entities throughout the United States in all facets of environmental counseling, permitting, and due diligence. In addition, our litigators defend clients in a wide range of civil and criminal enforcement actions arising out of the major federal environmental statutes, as well as climate change regulation, renewable energy regulation, and project development. For more information, please visit www.akerman.com

[CARLTON FIELDS](#) has more than 300 attorneys and government and financial services consultants serving clients from offices in California, Connecticut, Florida, Georgia, New Jersey, New York, and Washington, D.C. The firm serves a mix of international, national, and local businesses, state and local public entities and individuals. Members of the firm's Government Law and Consulting practice have extensive experience in all areas of environmental, land use, regulated industries such as utilities and medical marijuana, and administrative law and governmental consulting at the local, state, and federal levels. The practice includes not only transactional work but also significant litigation. The group employs AICP planners to assist its clients in environmental permitting land use matters including siting due diligence, permitting, zoning, code review, site plans, sector plans, DRIs and then rescission, comprehensive plan amendments, condominiums and community associations and state and local advocacy. For more information, please visit <http://www.carltonfields.com>.

[CSA OCEAN SCIENCES INC. \(CSA\)](#), founded in 1970, is a marine environmental consulting firm that specializes in multidisciplinary projects concerning potential environmental impacts of activities in coastal and marine ecosystems and offers a wide variety of desktop and field survey services to support our clients worldwide. CSA's programmatic approach provides our clients with objective data collected in the field and through desktop-based scientific research while maintaining an appreciation for the environmental, legal, and political sensitivities frequently associated with controversial marine and coastal projects. Our 50-year corporate track record has resulted in a reputation of reliable technical performance, unbiased analyses, and scientific integrity. Utilizing the extensive knowledge of our personnel, in our 10 offices worldwide, in addition to the techniques, facilities, equipment, and business considerations of applied sciences and technologies, CSA is staffed and equipped to offer a complete range of services for projects in offshore, nearshore, estuarine, wetland, and freshwater environments. www.csaocean.com.

[DEWBERRY](#) is a multi-disciplined firm with a proven history of providing architecture, consulting, engineering, and management services to a wide variety of public- and private-sector clients. Recognized for combining unsurpassed commitment to client service with deep subject matter expertise, Dewberry is dedicated to solving clients' most complex challenges and transforming their communities. Established in 1956, Dewberry is headquartered in Fairfax, Virginia, with more than 50 locations, including 15 offices in Florida, and over 2,000 professionals nationwide. We remain a client-focused, family-owned business supporting our clients' operations and enhancing community initiatives.

[DRMP, Inc.](#) is a privately-held, multi-disciplined civil engineering and surveying firm that develops innovative design solutions for infrastructure development in the public, private and industrial sectors.

With 16 offices throughout the southeastern United States and more than 450 employees strong, DRMP specializes in civil engineering, surveying, planning, environmental sciences and construction inspection services. DRMP's ecological experts work as a liaison between our clients and government regulatory agencies to formulate acceptable alternatives that effectively minimize impacts to natural resources. By collaborating early in the project's process, our staff gains an understanding of our clients' objectives to implement a customized project approach. Today, DRMP is ranked among Engineering News-Record's "Top 500 Design Firms" in the United States. For more information, please visit www.drmp.com.

Florida-based [ENVIRONMENTAL CONSULTING & TECHNOLOGY, INC.](http://www.ectinc.com) (ECT), serves private and public sector clients by integrating science, engineering, technology, planning, sustainability, and management systems to provide practical solutions to complex challenges. With 21 offices nationwide and six offices in the state of Florida, our deep knowledge of local, state and federal permitting requirements and strategies addressing water, wildlife, ecosystem and other regulatory components is an asset to any efforts in the natural and built environment. For more information about our Florida or national capabilities, please visit www.ectinc.com.

With approximately 900 attorneys in 20 offices, [FOLEY & LARDNER LLP](http://www.foley.com) provides award-winning business and legal insight to clients across the country and around the world. Our team-based approach, innovative technology, and focus on value and client service are continually recognized by our clients and the legal industry. For 13 consecutive years, Foley has been recognized on the BTI Client Service A-Team, a client service survey of *Fortune* 1000 corporate counsel (2016 BTI Client Service A-Team survey, The BTI Consulting Group, Wellesley, MA). In addition, Foley received 27 national Tier 1 rankings in the 2017 edition of *U.S. News – Best Lawyers*® "Best Law Firms" and was named to the *InformationWeek* 500 list for seven of the past eight years for technological innovation that enhances business value. Learn more at [Foley.com](http://www.foley.com).

[GEOSYNTec CONSULTANTS](http://www.geosyntec.com) is a consulting and engineering firm that works with private and public sector clients to address new ventures and complex problems involving our environment, natural resources, and civil infrastructure. Our engineers, geologists, environmental scientists, and other technical and project staff specialize in the areas of environmental studies and cleanup; infrastructure assessment, engineering, and design; environmental, health, and safety management; natural resources assessment and restoration; and structural extreme load analyses, fluid dynamics, and risk mitigation services. Our firm's practitioners deliver advanced solutions throughout the United States and at select locations in Australia, Canada, Ireland, and the United Kingdom. Geosyntec was founded in Florida, where the firm maintains nine offices, including its corporate operations team. Most of Geosyntec's Florida practitioners have spent the majority of their career in the state. They have provided strategic counsel to officials with the Florida Department of Environmental Protection (FDEP); Region IV of the U.S. Environmental Protection Agency (USEPA); the Florida water management districts; and the Jacksonville District of the U.S. Army Corp of Engineers (USACE), among many others. www.geosyntec.com

[GHD](http://www.ghd.com) is one of the world's leading professional services companies operating in the global markets of water, energy and resources, environment, property and buildings, and transportation. Privately owned by our people, GHD provides engineering, environmental and construction services to private and public sector clients across five continents and the Pacific region. GHD has earned a reputation for excellence in site assessment and remediation, compliance, environmental impact assessment, permitting, waste management, emergency response, stakeholder engagement, water resources, and natural resource management. Committed to sustainable development, GHD improves the physical, natural and social environments of the many communities in which we operate. www.ghd.com

[KLEINFELDER](http://www.kleinfelder.com) is an environmental and engineering consulting firm providing solutions to meet our world's complex infrastructure and natural resource challenges. With over 50 locations throughout the U.S., Canada and Australia, Kleinfelder employs over forty people in three Florida office locations: Mt. Dora, Jacksonville, and Tampa. Our offerings include a diverse set environmental engineering,

planning, and permitting services that are key to mining, industrial, transportation, and commercial projects in Florida and the southeast. We have highly experienced professionals in wetland and wildlife regulation and conservation, all stages of project due diligence and environmental permitting, civil engineering design and permitting, hydrogeology and water resources, geotechnical investigations, air permitting and testing, industrial hygiene and safety, and construction materials testing. Working as a team, our bright people will deliver the right solutions for clients. www.kleinfelder.com

[LEWIS, LONGMAN & WALKER, P.A.](#) For more than 25 years, the attorneys at LLW have helped the individuals, businesses and governments that have shaped Florida's future. We offer solutions to issues associated with complex local, state, and federal laws and regulations. We focus on the specific, technical and seemingly ever-changing areas of Environmental, Land Use and Governmental Law. LLW is comprised of well-known and respected attorneys with the experience and skill to quickly resolve difficult legal challenges. We believe in building long-term attorney-client relationships based upon collaboration and solid performance. We are committed to responding to clients' needs promptly and economically. Our offices are in Jacksonville, Tallahassee, Tampa, St. Petersburg and West Palm Beach. Wherever you are, we're nearby. www.llw-law.com

[MITIGATION MARKETING](#) Founded in 1998, Mitigation Marketing was the first company of its kind in Florida, and today the company remains the largest firm specializing in marketing support for mitigation banks. Known throughout the nation as a leader in the mitigation banking industry, Mitigation Marketing has developed a systematic approach to the marketing and sales of mitigation credits and focuses on service at every level. Using this approach, Mitigation Marketing has created the largest inventory of mitigation credits in the state of Florida.

[NORTHSTAR CONTRACTING GROUP, INC](#) (NorthStar) is a licensed State of Florida Professional Engineering and Construction firm headquartered in Tampa, Florida with service centers in Tallahassee, Orlando and West Palm Beach. We are an established and respected provider of professional civil and environmental engineering, construction and emergency response services focused on serving State and local municipal governments. For over 30 years, NorthStar has provided expertise and solutions to challenging regulatory, environmental and water resource issues that affect our clients. Our areas of specialization include: all phases of environmental site assessments; petroleum contamination assessments and remediation; storage tank assessments; construction management services; hazardous materials management, response and cleanup; brownfields coordination, funding management and implementation; contaminated site management and safety evaluations; land acquisition and natural resource management; environmental permitting; regulatory compliance; computer and GIS modeling; civil and water resource engineering; and, mold/lead and asbestos testing and abatement. Since 1997, we have provided these services for State of Florida municipalities, County agencies and State agencies including the Florida DEP, Florida DOT, Florida Fish and Wildlife Conservation Commission, and all five of the State of Florida Water Management Districts. www.northstar.com.

[SOUTHERN STATES](#) is a subsidiary of The J. M. Burguières Co., Limited, the oldest single family-owned land holding company currently in operation in Louisiana. In 2015, Southern States Land & Timber began its environmental venture as it acquired Lake Wales Ridge Conservation Bank in Central Florida providing habitat for endangered Sand Skinks and Gopher Turtles. Currently, Southern States Land & Timber has 4 mitigation banks and 2 conservation banks and 4 mitigation banks in the permitting stage. Our latest bank to open is Mangrove Point Mitigation Bank, which is a premier estuarine restoration project. Southern States restored the 469-acre disturbed site back to its highly valuable natural state of mangrove forest, saltern, and other associated habitat, enabling the site to be an important contributor to the greater ecosystem of the eastern Tampa Bay shoreline tidal community integrated with the adjacent E. G. Simmons Park, the Wolf Branch Park, and other conservation lands. Southern States is committed to the management and preservation required to re-establish and enhance critical habitats that exist on our properties utilized by protected and endangered wildlife species. In coordination with USFWS, we can provide species specific compensatory mitigation for

unavoidable habitat impacts and incidental take related to commercial development, utilities, and roadways in Central Florida. www.sstllc.com

STANTEC Communities are fundamental. Whether around the corner or across the globe, they provide a foundation, a sense of place and of belonging. That's why at Stantec, we always design with community in mind. We care about the communities we serve—because they're our communities too. This allows us to assess what's needed and connect our expertise, to appreciate nuances and envision what's never been considered, to bring together diverse perspectives so we can collaborate toward a shared success. We're designers, engineers, scientists, and project managers, innovating together at the intersection of community, creativity, and client relationships. Balancing these priorities results in projects that advance the quality of life in communities across the globe. Stantec trades on the TSX and the NYSE under the symbol STN. Visit us at stantec.com or find us on social media. Visit us at stantec.com or find us on social media.

TERRACON is a 100 percent employee-owned consulting engineering firm providing quality services to clients. Since 1965, Terracon has evolved into a successful multi-discipline firm specializing in environmental, facilities, geotechnical and materials. Over its history, Terracon has achieved significant expansion through both internal growth and acquisitions. Terracon currently has more than 4,500 employees in more than 150 offices and 50 states nationwide. Additionally, we partner with our U.S. clients to serve their international needs. The firm's success is further evidenced by a current ranking of 24 in Engineering News-Record's 2018 listing of the Top 500 Design Firms, as compared to a ranking of 41 a decade ago. Terracon's growth is due to dedicated employees who are responsive to clients, provide quality services, and take advantage of opportunities in the marketplace. Our environmental services include: site assessments and investigations; remedial design and implementation; Brownfields/site redevelopment; natural resources/wetlands delineation/mitigation; industrial hygiene/health and safety; asbestos/lead/mold/indoor air quality; regulatory compliance; environmental management systems; and solid waste planning and design.

THE WETLANDSBANK COMPANY (TWC) is one of the nation's most respected and successful mitigation bankers. TWC developed its wetland bank in Pembroke Pines, FL; the first credit transfers ever authorized by the Army Corps of Engineers. TWC has completed the transfer of the 2,778-acre Panther Island Mitigation Bank in Naples, FL to the Audubon of Florida's Corkscrew Swamp Sanctuary, as the long term managers and is currently restoring an additional 1,841 acres that has been added to the existing bank project. Panther Island's commitment to the environment has earned national and international recognition. Corkscrew Swamp Sanctuary, including the Panther Island Mitigation Bank, was named a Ramsar Wetland of International Significance, one of only 26 in the United States. It was the first time ever that a mitigation bank has received this honor. During 2015 TWC added Corkscrew Regional Mitigation Bank to its portfolio thus furthering its commitment to the Southwest Florida market. TWC has completed the first phase of construction on Blackwater Creek Mitigation Bank north of Orlando in the Wekiva Basin. TWC has expanded into Georgia with the Legacy Farms Stream Bank south of Atlanta. TWC has expanded into Mississippi by partnering with founders of Delta Mitigation Bank. TWC seeks partnerships with public or private entities to design, permit, develop, market, and operate mitigation banks, and also sells mitigation credits on behalf of entities, such as Broxton Rocks Mitigation Bank a stream and wetland bank also in Georgia and Panther Passage Conservation Bank, a Panther Habitat bank in Hendry County, Florida. Contact: Robert B. Miller, Chief Executive Officer & President, 10097 Cleary Blvd. Suite #303 Plantation, FL 33324 (954) 642-2463; rmiller@wetlandsbank.com; www.wetlandsbank.com

For nearly six decades, **UNIVERSAL ENGINEERING SCIENCES (UES)** has provided essential engineering services throughout the United States, including Geotechnical Engineering, Construction Materials Testing & Inspection, Building Code Compliance, Environmental, Occupational Health & Safety, and Building Envelope. Experienced and proven, UES is considered a pioneer of the industry and stands at the forefront of emerging technology, best practices, and influential legislature. Our work includes both public and private clients and consists of projects ranging from transportation and healthcare to commercial and education. Our engineers, geologists, certified inspectors, and scientists

offer an unwavering commitment to excellence, approaching each project as an opportunity to cultivate enduring relationships with our clients. Built on experience and driven by a determination to see our clients through to success, UES remains focused, optimistic, and grounded in excellence. Our team provides sound, client-focused solutions for real estate related environmental liabilities and occupational health and safety compliance issues. We offer comprehensive integrated services, extensive technical expertise, and a long-standing reputation for excellence and integrity. As a well-established and growing firm, UES offers a diverse range of services to help our clients maintain compliance and achieve their goals with the focus of being a solution provider that can assist in managing project liabilities and risks. As a recognized regional leader in environmental and occupational health and safety consulting services, UES has the technical team to protect your assets and promote the sustainability of your business. ACTION ENVIRONMENTAL is a growth-oriented, leading provider of environmental and industrial services for environmental engineering and consulting firms, environmental companies, power generation and utility clients, pipeline and terminal companies, manufacturers and more. Motivated by a solutions based project management culture, we successfully develop and maintain long-term relationships with our customers, who value our proven track record for industry leading execution and customer service. Our staff is composed of experienced project managers, construction managers, engineers, and geologists with hundreds of years of combined experience. Our people are ethical, experienced and environmentally conscious entrepreneurs committed to getting the job done right for our customers safely, the first time, every time. Originally formed in 1992, Action Environmental's expertise enables us to provide a range of services to public and private sector clients, as well as government purchasers. We are financially strong and have adequate working capital to manage multiple projects in various geographic regions. Action Environmental has developed and maintained a reputation for safe, dependable, on time and cost effective performance, with an emphasis on competent project management, responsiveness and results. Our hands-on, self-performing experience, coupled with our knowledge of permitting and regulatory requirements, make Action Environmental a preferred contractor for any environmental construction, remediation project or complex environmental services project. Over the years, the complexity of our projects has advanced from basic cleanup and disposal projects to multi-year, multi-phase site remediation. Action Environmental has completed thousands of environmental, construction, remediation and hazardous waste management projects. The success of our company is built on the experience of our management team, the knowledge of our dedicated employees and our commitment to health, safety and the environment. www.actn.com

For 30+ years, [APTIM](https://www.aptim.com/) has provided full-scale engineering, facility decommissioning, environmental remediation, operations and maintenance, program/construction management, and design and construction services for government and private sector clients, including remediation and restoration of contaminated sites, emergency response, and disaster recovery. With a combined workforce of more than 5,800 people in over 50 corporate/project offices and more than 100 field offices, we provide reliable solutions while maintaining a relentless focus on safety and an uncompromising standard of quality. In support of environmental and resiliency projects APTIM's Coastal, Ports, and Marine (CPM) Group provides services in coastal engineering and restoration, port engineering and equipment, flood control engineering, and coastal and marine sciences. The APTIM team is multidisciplinary with coastal engineering, restoration, and coastal and marine science service specializing in all aspects of beach nourishment, shoreline protection projects, coastal and marine mapping, and coastal resiliency and sea-level rise work. APTIM's engineers, biologists, geologists, surveyors, Computer Aided Design (CAD) and Geographic Information Systems (GIS) specialists work with both government and private clients on a wide range of environmental and coastal issues. With five offices in Florida, since 1984, APTIM has conducted over 100 coastal engineering projects, more than 45 coastal structural stabilization projects, developed 14 Inlet Management Plans throughout Florida, has conducted over 100 borrow area studies (identifying 500+ million cubic yards of restoration material) and has conducted more than 500 beach surveys (25,000+ profiles). With APTIM's client focused, solution driven team you can expect the extraordinary. For more information, please visit <https://www.aptim.com/>

[BILZIN SUMBERG](http://www.bilzin.com) is a commercial law firm based in Florida dedicated to delivering the highest quality legal counsel to a wide range of distinguished clients whose business, legal opportunities, and challenges span the United States crossing borders with Europe, Latin America, Canada, the Middle East, and Asia. The firm's growth has paralleled that of its Miami home base, a region known for its rich cultural, social, and professional diversity. Bilzin Sumberg lawyers concentrate on services at the heart of both regional and international commerce, including real estate, land development and government relations, environmental, corporate law, joint ventures, domestic and international tax and estate planning, business litigation, finance and public-private partnerships. Our environmental attorneys provide innovative solutions to a wide range of environmental issues faced by Florida's development and redevelopment community. As part of the firm's Government Relations & Land Development practice group, the environmental team works closely with the Firm's Corporate, Real Estate and Litigation practices to support all aspects of regulation, permitting and enforcement actions related to federal and state wetland regulations, brownfields redevelopment, stormwater management and permitting, marina permitting and operation, landfills, regulatory permitting, hazardous waste and land development. For more information, please visit www.bilzin.com.

[BIO-TECH CONSULTING, INC.](http://www.bio-techconsulting.com) is a full-service environmental consulting firm headquartered in Orlando, Fla. with offices across the state and clients throughout Florida and the Southeast. Our team of scientists, planners and project managers works to guide all of our clients through successful permitting and compliance processes on local, state and federal levels. Services include permitting, environmental assessments, wetlands mitigation, monitoring, wildlife sciences, erosion and sediment control, pond management, lake management, and landscaping services. Projects range from single-family residences to master-planned communities to government facilities. With the expertise, equipment, knowledge and commitment, Bio-Tech Consulting guides its clients through the increasingly complex and rapidly changing permitting and compliance processes. Our mission is to help our clients maximize development opportunities, minimize timeframes and achieve ecologically sustainable solutions. To learn more, please visit www.bio-techconsulting.com.

[DE LA PARTE & GILBERT, PA](http://www.de-laparte.com) is based in downtown Tampa. Our law firm was founded in 1975 and has been involved in shaping much of the law that affects Florida's environmental, health, social services and governmental policies. Our firm serves a diverse portfolio of state, national and international clients. While our lawyers practice in over 20 areas of law, we focus primarily on Business Transactions, Environmental and Land Use Law, Government, Health Law, and Civil Litigation. We recruit and retain highly skilled, sophisticated lawyers who are rated among the best in the

profession. de la Parte & Gilbert as a firm is “AV” rated by Martindale-Hubbell and several of our attorneys are Florida Bar board certified. For more information, please contact us at (813) 229-2775 or visit our website at www.dgfirm.com.

ECOSYSTEM INVESTMENT PARTNERS (EIP) delivers high-quality, large-scale mitigation solutions in Florida and nationwide. EIP acquires, restores, and permanently protects priority conservation properties. Through our restoration, we provide mitigation and other environmental offset solutions to public and private developers and government agencies. Our restoration solutions include 54 projects in eleven states, including 5 in Florida, protecting over 45,000 acres, and our national footprint continues to expand. We are a team of 13 professionals with deep experience in real estate, ecological restoration, permitting, and mitigation sales. We partner with regional ecologists on every project. Our approach – convening an expert, project-specific team – delivers our clients a winning mitigation outcome, pairing our national experience and firm strength with specialized ecological expertise. www.ecosystempartners.com

ERIN L. DEADY, P.A., is a Florida based firm representing clients statewide from the panhandle to the Florida Keys primarily in the area of environmental and governmental law. Its attorneys have assisted clients at federal, state, regional, and local levels in the private and public sector in all areas of environmental and land use law. Our attorneys work on projects and matters such as Gulf Restoration, sustainability, climate change preparedness and resiliency, energy, public finance, special districts, legislative matters, NEPA, water use and regulation, litigation matters, comprehensive planning, land use and zoning and land development regulations. The firm maintains an active practice in seeking, managing and securing governmental grants and unique special assessments. www.erindeadylaw.com.

ESA is an environmental consulting and planning firm committed to the principles of sustainability. We specialize in environmental planning, scientific technical studies and investigations, environmental assessments, cultural resource services, ecosystem restoration and mitigation design, climate change solutions, and regulatory permitting and compliance. With diverse practice groups and multiple offices nationwide, ESA's nimble, multidisciplinary teams provide world class expertise to deliver innovative and cost-effective solutions to our clients. To learn more about ESA, visit our website at www.esassoc.com.

E SCIENCES, INCORPORATED, excels at providing engineering, environmental and ecological consulting services to clients in both the public and private sectors. From our offices in Orlando, Fort Lauderdale, Miami, DeLand and Clearwater, our staff has successfully executed projects throughout Florida and the Southeastern United States. Our services include stormwater engineering, environmental permitting, wetland assessment, threatened and endangered species assessments, arborist consulting services, land management and restoration, mitigation, environmental assessments, contamination and remediation, water resource services, NPDES consulting, TMDL consulting, and Brownfield and urban revitalization planning. www.esciencesinc.com

FLATWOODS CONSULTING GROUP INC (Flatwoods) is a Florida-based Small Business Enterprise (SBE) specializing in assisting our clients with the complex regulations associated with natural resources. Our goal is to provide the highest quality consultation to our clients in a cost-effective manner. We accomplish this through honest and consistent personal contact and by putting the long-term needs of our clients and staff members before short-term corporate gain. We strive to attract and retain both clients and staff for the duration of their careers, not just for the duration of a project. Our team of highly qualified scientists and professionals has advanced degrees, professional certifications, and project experience related to many aspects of upland, wetland, and benthic ecology, wildlife surveys, and various types of ecological monitoring, permitting, and mitigation. Flatwoods' staff members have served clients in the southeastern United States for over fifteen years. Our comprehensive technical approach, in-depth understanding of ecology, and regulatory experience result in invaluable project solutions for our clients. Flatwoods has experience in successfully addressing the complex environmental and regulatory challenges associated with transportation and

utilities, mining, agriculture, and municipal projects as well as industrial, commercial, residential, and multi-use developments. www.flatwoodsconsulting.com.

[FLORIDA LIMEROCK & AGGREGATE INSTITUTE \(FLAI\)](#) represents the Florida construction aggregates industry. Our member companies strive every day to responsibly extract and produce the various stone and sand products that are found in the countless miles of roads; in our homes, schools, churches, and hospitals; and in a myriad of other structures located throughout the state. These products literally form the foundation upon which our way of life is built and are essential and critical to our economic health, well-being and future generations. FLAI is also dedicated to ensuring a healthy business climate for its member companies. Our many highly-qualified and specially trained employees are gratified to bring value to our customers every day and FLAI is gratified to represent them. <https://myflai.org/>

[FLORIDA POWER & LIGHT COMPANY – EVERGLADES MITIGATION BANK](#) (EMB) is a wetland restoration project which services Miami-Dade, Broward and the southern portion of Palm Beach County. The 13,249-acre project is located in southern Miami-Dade County and is home to several unique ecosystems supporting 46 protected species of plant and animal life. With its large size and unique location, Everglades Mitigation Bank is a major contributor to a seamless corridor between Biscayne National Park and Everglades National Park. The EMB is owned and operated by Florida Power & Light Company (FPL) and is the largest energy company in the U.S. as measured by retail electricity produced and sold. The company serves more than 5.6 million customer accounts supporting more than 11 million residents across Florida with clean, reliable and affordable electricity. FPL operates one of the cleanest power generation fleets in the U.S and in 2020 won the ReliabilityOne® National Reliability Excellence Award, presented by PA Consulting, for the fifth time in the last six years. The company was recognized in 2020 as one of the most trusted U.S. electric utilities by Escalent for the seventh consecutive year. FPL is a subsidiary of Juno Beach, Florida-based NextEra Energy, Inc. (NYSE: NEE), a clean energy company widely recognized for its efforts in sustainability, ethics and diversity, and has been ranked No. 1 in the electric and gas utilities industry in Fortune's 2020 list of "World's Most Admired Companies." NextEra Energy is also the parent company of NextEra Energy Resources, LLC, which, together with its affiliated entities, is the world's largest generator of renewable energy from the wind and sun and a world leader in battery storage. For more information, visit <https://www.fpl.com/environment/wildlife/mitigation-bank.html>.

[GOLDER](#) Renowned for technical excellence, [Golder](#), a member of [WSP](#), is a leading global specialized engineering and consulting organization with over 60 years of successful service to its clients. By joining forces with WSP, Golder is now part of a 14,000-person strong earth and environment practice, providing engineering, remediation, regulatory & compliance, design, and environmental services on projects that span all seven continents. Our professionals are driven by a passion to deliver results, offering unique specialized skills to address the ever-evolving challenges that earth, environment, and energy present to clients across the infrastructure, mining, oil & gas, manufacturing, and power sectors. As a member of WSP, Golder can leverage a deeper bench of resources and a broader global footprint to better serve clients around the world.

The [GREYTER](#) HOME™ is a compact, patented, fully automated water recycling system that can reduce indoor water consumption up to 25 percent. This award winning and NSF Certified solution captures water from showers and bathtubs and reuses it for toilet flushing. Just two showers a day is typically enough water to meet the demands for toilets for a family of four. So, why are we flushing toilets with potable water? With the Greyter HOME™, you do NOT have to! The Greyter HOME™ helps communities implement long-term, sustainable water strategies and can enable builders to achieve municipal incentives for water conservation like lower water connection fees, accelerated permit approvals, development credits, and greater density of homes in a development project. Winner of the 2017 Best New Green Building Product at the International Builders Show, The Greyter HOME™ was designed with input from some of the largest US Builders. And now in Florida, as a result of this year's passing of SB 64, there are significant incentives to builders and developers to include the Greyter HOME™ within their communities. SB 64 offers the following incentives:

- When greywater systems are included within 75% of all homes within a proposed project, the developer (builder) is entitled to a 25% density bonus
- When greywater systems are included within 100% of all homes within a proposed project, the developer (builder) is entitled to a 35% density bonus

The development must have a minimum of 25 single-family homes (detached or multi-family, maximum 5-stories) and each home/unit must have its own designated system. Bonuses apply to all local governments including special districts. www.greyter.com

[HALFF ASSOCIATES](http://www.halff.com), Inc. an employee-owned, full-service national engineering and architecture firm that provides services from 25 offices located throughout the South, including seven in Florida: Chipley, Jacksonville, Miramar Beach, Panama City Beach, Tallahassee, Tampa and Tavares. We are comprised of more than 1,000 professionals, including licensed engineers, architects, planners, scientists and surveyors. *Engineering News-Record* ranks Halff No. 106 of the top 500 design firms in the United States. Halff was founded in Dallas in 1950 by Albert H. Halff, PhD-Eng., PE. Today, we preserve Dr. Halff's legacy of integrity, dedication to client service, technical knowledge and commitment to quality. We are an innovative firm committed to providing value with creative and resilient solutions to design challenges. Our people are individuals with diverse, yet complementary, professional backgrounds. To learn more about Halff's culture and services, visit www.Halff.com.

[HRP ASSOCIATES, INC.](http://www.hrp.com) was founded in 1982 to serve the environmental needs of the regulated community subject to the newly-enacted Resource Conservation Recovery Act (RCRA). Today, HRP is a multidisciplinary environmental and engineering consulting firm, with nine offices throughout the U.S. We have completed projects in nearly every state. Not only do we provide critical services to clients throughout the U.S., we have also extended our Global Consulting Services to over twenty countries throughout the Americas, Europe, and Asia. We provide a full range of environmental and civil engineering consulting services to private and public sector clients. HRP's consulting engineers are highly qualified to help you assess, manage and reduce EH&S risks, to operate more efficiently and profitably, and to improve the design and function of your current and future facilities.

[HSW CONSULTING](http://www.hsweng.com), formerly HSW Engineering, is an integrated earth science and engineering firm providing proactive, innovative, and cost-effective solutions for Environmental, Water Resources and Civil/Land Development projects. HSW is pleased to announce that in January 2021, our organizations were combined through joint ownership to create a growing platform of highly regarded engineering and environmental consultants with comprehensive and complementary capabilities. [HSW](http://www.hsweng.com), [Hull](http://www.hull.com), [Duffield](http://www.duffield.com) and [Geolinsight](http://www.geolinsight.com) continue to maintain our own brands while immediately integrating our operations and services to benefit our clients. We share the same commitment to health and safety, high-quality personalized service, innovative value-added solutions, environmental stewardship, and community involvement. The platform serves clients nationwide and has a broad geographic presence throughout the eastern half of the United States with 24 offices, three of which in Florida. Our personnel and service capabilities are rooted in engineering (civil, wastewater, environmental, geotechnical, dam, landfill, structural, transportation, municipal and electrical), geology, hydrogeology, soil physics, hydrology, hydrologic (groundwater and surface water) and solute transport modeling, stream and wetland restoration, resiliency, chemistry, ecology, toxicology, environmental health and safety management, GIS and mapping, data validation, risk assessment, and data management. To learn more about HSW and its valued partners, please visit <https://hsweng.com/necs-companies/>.

[HULL'S ENVIRONMENTAL SERVICES, INC.](http://www.hulls.com) is a woman-owned small business operating from locations in Florida, Georgia, Oklahoma and Texas. We support a vast array of government, commercial, and industrial clients with a diverse range of services, from site investigation and remediation to renewable energy and regulatory

compliance. We leverage our regulatory insight, technical expertise, and integrated thinking to help our clients understand and resolve their complex environmental issues. MSE Group, Inc is proud to be the newest MEG affiliate. <http://www.montrose-env.com>

[NASON YEAGER GERSON HARRIS & FUMERO, P.A.](http://www.nasonyeager.com) was founded in 1960, and is one of the oldest Florida-based law firms in the State. Founded in 1960, and Martindale-Hubbell AV rated, the firm provides strategic legal counsel to a wide array of public and private sector clients throughout the State of Florida. Our attorneys are highly experienced in a variety of disciplines encompassing all aspects of environmental, land-use, administrative, governmental, and real estate law, as well as governmental affairs representation and litigation related to those practice areas. We have a proven track record of results-driven work involving federal and state environmental and water permitting, agency enforcement, project development, water management, land use entitlements, public/private partnerships, land development, due diligence, agency rulemaking, environmental remediation, brownfields redevelopment, and hazardous waste. Integral to the team, we work closely with engineers, geologists, planners, and other consultants. Our representation covers a full range of projects including residential, commercial, mining, industrial, transportation, and marina projects throughout the State. The firm provides complex civil and appellate litigation services in all administrative, state and federal courts. Throughout its 60-year history, Nason Yeager Gerson Harris & Fumero has served a diverse client base, with a Florida focus, utilizing innovative strategies to achieve efficient and effective solutions. Offices in Boca Raton and Palm Beach Gardens. Visit www.nasonyeager.com.

[OERTEL, FERNANDEZ, BRYANT & ATKINSON, P.A.](http://www.ohfc.com) The law firm of Oertel, Fernandez, Bryant, & Atkinson, PA, has been providing high-quality legal services in the areas of Environmental, Land Use, Regulatory, Governmental, and Licensing Law to clients throughout Florida for more than 30 years. The firm represents clients in the private and public sectors in state and federal courts, and before federal, state, and local agencies. The firm's regulatory practice includes water resources, water and air permitting, wetland permitting, mining, submerged lands, growth management, zoning, utilities and energy law, health care law, labor law, and professional licensing matters. The firm routinely assists clients with issues involving competitive bidding, bid protests, eminent domain, corporate law, construction law, lien law, employment disputes, and non-competition agreements. The firm also lobbies on behalf clients before the executive and legislative branches of the State of Florida. In order to attain our client's goals, we have developed and fostered good working relationships built on trust with many regulatory agencies, including the Florida Department of Environmental Protection, the Army Corps of Engineers, Florida's five Water Management Districts, the Department of Business and Professional Regulation, the Agency for Health Care Administration, the Florida Department of Health, the United States Environmental Protection Agency, the Florida Department of Community Affairs, the Florida Department of Financial Services, the Florida Department of Agriculture and Consumer Services, the Florida Public Service Commission, and the Florida Department of Transportation. The firm is "AV" rated by the national Martindale-Hubbell Legal Directory. The "AV" rating is the highest designation attainable and is based on a firm's professional qualifications, reputation, and ethics. www.ohfc.com. The firm has also been recognized by Chambers Best for Business as one of the top law firms in Florida for environmental matters. Individual members of the firm have been recognized by the Florida Trend Magazine as "Legal Elite" (Segundo J. Fernandez, Timothy P. Atkinson, and Sidney C. Bigham III), by Chambers Best for Business (Kenneth Oertel and Segundo J. Fernandez), and by Super Lawyers (Kenneth Oertel, Segundo J. Fernandez, and Timothy Perry). www.ohfc.com.

[PASSARELLA & ASSOCIATES, INC.](http://www.passarella.com) is a full-service ecological and environmental consulting firm that has built its reputation on the skillful application of science and sound ecological principles. For over 20 years, our dedicated team of ecologists, biologists, environmental consultants, GIS analysts and support staff members have developed a thorough understanding of permitting, agency requirements and regulations, as well as an appreciation of the intricacies and nuances of our environment. Passarella & Associates expertly creates the perfect balance of progress and nature. With offices in Florida and South Carolina, we provide environmental and GIS consulting services throughout the southeast, specializing in wetland delineations and permitting, wetland mitigation design and

monitoring, and protected species services including assessments, permitting, relocation, and habitat management. Our GIS division offers custom mapping, GIS data collection and production, database services, geospatial analysis, and GIS web applications. To learn more about Passarella & Associates, please visit our website at www.passarella.net.

PHILLIPS & JORDAN, INC. (P&J), a Phillips Infrastructure Holdings, Inc. company, is a certified woman-owned, heavy civil and infrastructure contractor established in 1952. Our Core Values and Priorities – Integrity, Safety, Quality, and Production – guide our daily business practices. P&J is a People First company, and we hold safety as an imperative above all other objectives. We carry this commitment with us as we pursue challenging projects in three primary service areas: Heavy Civil Infrastructure Development (Power Generation, Water Resources, Mining, and Industrial & Commercial), Right-of-Way Infrastructure Development (Power Delivery, Pipeline Services, and Foundation Construction), and Disaster Response. P&J is a national contractor that is registered to do business in all 50 states and has performed work in over 40 states over the past decade. Headquartered in Knoxville, TN, P&J currently employs a workforce of approximately 1,000 individuals and maintains regional and project offices throughout the United States. Our new Florida Headquarters is located just off I-75 and SR 52 in San Antonio (Pasco County), allowing us to continue our decades of work in Florida. A few P&J water resources projects include the L-8 Reservoir with SFWMD, the 4G Ranch Beneficial Reuse Wetland Creation Project with Pasco County and SFWMD, the C-51 Reservoir Phase 1 Project with South Florida utilities, and the EAA Stormwater Treatment Area with SFWMD. P&J is very comfortable with public-private partnerships and alternative delivery through collaboration. <http://www.pandj.com>

PINE ENVIRONMENTAL/ XYLEM ENVIRONMENTAL SOLUTIONS

Pine Environmental Services LLC (Pine) is a Professional Service Company, engaged in providing rental equipment in the U.S. and Canada for Environmental Monitoring, Non-Destructive Testing, Visual Inspection, as well as Continuous Emissions Monitoring (CEMS). Pine has the largest stock of rental equipment in our warehouses with 39+ branches across North America. All the conditions of our instruments are assessed under strict quality control measures, cleaned, charged, and calibrated prior to delivery. Pine is completely focused and committed to putting test and measurement equipment into the hands of those who need it, through short, medium, or long-term rentals. Pine also provides customized and alternative financial offerings for extended project requirements. Pine is committed to provide technical and application support on our wide range of test and measurement equipment and to make the availability of that equipment second to none. And as importantly: all equipment will be tested and ready for use.

Xylem Environmental Solutions is a manufacturer and solutions provider for environmental monitoring, sampling and laboratory analysis of water. We deliver the most technologically advanced, self-contained and integrated remote observation systems, monitoring buoys, water quality and velocity sensors in the world. YSI, SonTek and our other brands are proud to support the world's leading researchers on climate and environmental science—as well as government agencies who protect our communities' water resources. For more information on our products and solutions, visit www.YSI.com and www.SonTek.com.

PURE POLYMER SOLUTIONS (PPS) is a water treatment company that strives to return water to the environment safe, clean, and fits your budget. Our team of experts and full line of state of the art dewatering equipment that is fully integrated with telemetry ensures your SWIPP and NPDES effluent limitation guidelines are covered. In today's world sustainability is no longer an option, it's a requirement. PPS uses chemistries that are sustainable, carbon neutral, and always renewable, because they are made from plant-based materials. Additionally, we offer the full line of commodity chemistries that are vetted to ensure responsible and safe practices are guaranteed. For more information, please visit our website at www.purepolymersolutions.com.

[SCS](#) is an employee-owned environmental consulting and construction firm that designs and implements sustainable environmental solutions. SCS is a full service provider serving public and private clients across the nation and around the world. Our Florida offices have been providing environmental services throughout Florida since 1985 and currently are located in Boca Raton, Jacksonville, Miami, Orlando, and Tampa. We study challenges and design solutions; we remediate, build and operate environmental and energy projects and systems; and we monitor a wide range of environmental control systems. Our core capabilities are: site remediation, renewable energy, regulatory compliance for air, water, and soil, and solid and hazardous waste management. We remain at the forefront applying new processes and technologies to improve environmental compliance, reduce project risk, and provide our clients the ability to foresee and adapt business to environmental, social, economic and regulatory change. Continuous improvement, our in-the-field experience, and our deep involvement in the industries we serve help us deliver smart and simple solutions that work.

[SHUTTS & BOWEN LLP](#) is a full-service law firm with offices in all of the major Florida markets and a deep connection to the state's history. Established in 1910, the firm employs more than 290 attorneys who focus on more than 30 practice areas, including environmental law, land use and zoning issues, and real estate matters. Our environmental team helps clients manage the risks and liabilities involved in compliance, permitting, litigation and enforcement. Likewise, our land use and zoning attorneys help companies navigate through the regulatory labyrinth, regularly appearing before local, state, and federal agencies. For those involved in the development of commercial, office, hotel, residential or industrial projects, our real estate attorneys can assist in everything from getting a project planned, financed, and completed quickly while working with oversight agencies to get development approval. For more information, visit www.shutts.com.

[SMOLKER BARTLETT LOEB HINDS & THOMPSON, P.A.](#) The attorneys at Smolker Bartlett Loeb Hinds & Thompson, P.A. focus their practice on land use, environmental and property rights, including zoning, comprehensive planning, land use and environmental permitting, development exactions, natural resources law, submerged land rights, access rights, water use, eminent domain, inverse condemnation, regulatory takings and general complex commercial litigation at the administrative, civil trial and appellate litigation levels before local and state agencies, and in state and federal courts. Our passion is to efficiently and effectively solve our clients' legal problems while adding value to their enterprises. Contact us for a preliminary consultation as (813) 223-3888 or visit us online at www.sblfirm.com.

[SOUTHERN WASTE INFORMATION EXCHANGE \(SWIX\)](#) operates as a cooperative effort between the Department of Environmental Protection, the Florida Chamber of Commerce and Florida State University. SWIX serves as a non-profit clearinghouse and repository for business concerning information on solid and hazardous waste management alternatives; pollution prevention approaches; market development for recyclable materials in Florida; recycled projects which are available to Florida markets; the availability of and demand for waste materials; waste management services and products; and regulatory information related to solid and hazardous waste management. www.swixusa.org.

[TITAN ENVIRONMENTAL & CONSTRUCTION COMPANY, INC.](#) (Titan ECC) is an environmental and construction services company headquartered in Lakeland, Florida with a management staff with over 100 years of industry experience. Titan can offer a broad range of services from project inception to project completion. Titan was formed to offer "turnkey" solutions for our clients. Our company's foundation is built on our values which drives our actions. We conduct our business in an environmentally friendly and ethical manner while protecting the environment and benefiting the communities where we work. Our company and staff hold numerous professional licenses consisting of a Certified Professional Geologist holding licenses in both Florida and Alabama, a State of Florida Professional Engineering license, and a General Contractors license in the State of Florida. Titan is committed to providing sustainable solutions that meet specific client needs along with the long-term interests of the environment. For more information, please visit us at www.titanecc.com where our focus is on changing the environment one advancement at a time.

TRINITY CONSULTANTS For over 47 years, Trinity Consultants has assisted organizations with environmental permitting and compliance challenges, specializing in air quality issues (experts in air permitting and the go-to firm for dispersion modeling). Trinity places a great emphasis on hiring and developing the most talented environmental professionals to deliver accurate, thorough, and consistent compliance assistance. Our network of environmental experts spans North America and includes teams in China, Australia, Ireland, and the United Kingdom. With such a broad footprint, Trinity is able to serve a variety of clients with robust solutions based on the international forefront of environmental permitting and compliance strategy. By maintaining local offices in Florida with staff intimately engaged with DEP in Tallahassee, each district, and all local agencies, Trinity can combine national experience with local insight and relationships. Trinity provides innovative, cost effective solutions in the areas of air permitting and regulatory compliance, sustainability and environmental management, greenhouse gas reporting and strategy, air dispersion modeling, noise and ambient odor monitoring, EH&S auditing, toxicology & industrial hygiene, and EH&S information management. Trinity also provides extensive professional training on environmental topics, environmental modeling software, and environmental staffing services. www.TrinityConsultants.com

VHB sees the challenges of today as opportunities for tomorrow. Our team of over 1600 engineers, scientists, planners, and designers in 30 locations across the U.S. are future-focused on making our communities more sustainable, resilient, and equitable. With Florida offices in Orlando, Tampa, and Sarasota, we've served public and private clients in the Sunshine State for over 35 years. From planning and design for new communities to water quality monitoring and managing complex environmental permitting, VHB helps clients find the best planning, design and engineering solutions that respect our important ecosystems, and enhance local economies. VHB is a charter member of the Institute for Sustainable Infrastructure (ISI), the developer of the Envision Rating System, a tool that measures and facilitates the achievement of social, economic, and environmental sustainability goals through capital improvement projects. VHB employees serve on ISI's key committees and over 100 VHB employees have earned the Envision Sustainability Professional (ENV-SP) credential. www.vhb.com

WESTERVELT ECOLOGICAL SERVICES (WES) is the industry leader for mitigation and conservation solutions. Now in its 15th year, WES has established 27 mitigation and conservation banks in seven states, which includes the Pensacola Bay and St. Marks Mitigation Banks located in the panhandle of Florida. To date, WES's conservation efforts have led to the management of over 28,000 acres for stream, wetland, and wildlife habitat impacts, permanent protection of over 20 miles of stream, and restored habitat for over 50 endangered or federally threatened plant and animal species. WES is proud of its reputation of producing high – quality projects benefitting landowners, government agencies, non – profits, and land trust organizations across the United States as well as preserving resources for future generations. WES is a division of The Westervelt Company (TWC), a private land resource organization founded in 1884 and headquartered in Tuscaloosa, Alabama. TWC has a long history of sustainability, environmental responsibility, and quality. It is evident, the company and its employees appreciate the beauty and value of our natural resources and are committed to safeguarding them. WES has regional offices in Auburn, Alabama, Sacramento, California, Denver, Colorado as well as district offices in Tallahassee, Florida, and Nashville, Tennessee. For additional information, please visit <http://www.wesmitigation.com>

WOOD ENVIRONMENT & INFRASTRUCTURE Wood is a global leader in the delivery of project, engineering and technical services to energy and industrial markets. We operate in more than 60 countries, employing around 55,000 people, with revenues of around \$10 billion. We provide performance-driven solutions throughout the asset life-cycle, from concept to decommissioning across a broad range of industrial markets including the upstream, midstream and downstream oil & gas, chemicals, environment and infrastructure, power & process, clean energy, mining and general industrial sectors. We strive to be the best technical services company to work with, work for and invest in. www.woodplc.com

BRONZE SPONSORS

[AECOM](#) is a premier, fully integrated professional and technical services corporation with a comprehensive capability to design, build, finance and operate infrastructure assets around the world for public- and private sector clients. Our firm is a global provider of professional technical and management support services in a broad range of markets, including water, wastewater, transportation, facilities, parks and recreation, environmental and energy. While AECOM is worldwide, we value the local relationships that we have developed with each and every one of our clients. AECOM's professionals are driven by a common commitment to work in partnership with our clients to find practical, cost-effective solutions to their infrastructure needs. Many of our professionals worked for public agencies before joining the firm. They understand the needs, pressures, and constraints faced by clients when developing and implementing programs in public settings. As a result, AECOM experts are adept at forging true partnerships with clients and stakeholders as they strive to deliver programs innovatively and cost effectively. www.aecom.com

[BAKER DONELSON](#) is the 55th largest law firm in the U.S., with a team of more than 750 attorneys and public policy advisors representing more than 30 practice areas, located in 22 offices in 10 states and the District of Columbia, including offices in Tallahassee, Orlando, and Ft. Lauderdale, Florida. Baker Donelson team members are prepared to serve virtually any legal and policy need, including real estate, environmental, land use, and administrative law. We provide our clients a global network of local counsel and other professionals, and have helped our clients take advantage of opportunities in more than 90 countries spanning six continents. Visit our web site at www.bakerdonelson.com. Ralph A. DeMeo is a Shareholder in the Tallahassee office of Baker Donelson. Ralph has been practicing environmental and land use law for over 33 years in the State of Florida and the U.S., and represents corporate, individual, and local government clients in federal and state courts and before federal, state, and local agencies. Contact Ralph at rdemeo@bakerdonelson.com.

[BREEDLOVE, DENNIS & ASSOCIATES, INC. \(BDA\)](#) is a professional environmental and natural resources consulting firm founded in 1976. Since its inception, BDA has established a reputation for solving the most difficult environmental problems through the application of scientific principles, knowledge of the regulations, and the ability to effectively communicate with regulators and clients. For over 40 years, BDA has applied its expertise in natural systems ecology to environmental consulting in: wetland delineation; wetland assessment and mitigation planning; environmental permitting; wildlife and plant surveys; Threatened and/or Endangered species surveys and regulatory agency coordination; habitat restoration; land management planning; water quality; aquatic ecology; litigation support and expert witness services.

[BUCHANAN INGERSOLL & ROONEY PC](#) brings true partnership to our clients. We understand the service and partnership attributes our clients most value and have formalized a model for consistently achieving them. The firm has nearly 480 attorneys and government relations professionals practicing throughout the United States, with offices in 17 cities in California, Delaware, Florida, New Jersey, New York, North Carolina, Pennsylvania, Virginia and Washington, D.C. Buchanan provides the full array of legal services to our business clients, and our environmental and land use attorneys provide representation to both public and private clients before state, federal, local and regional governmental entities. Areas of practice include wetlands, consumptive use and coastal construction permitting, comprehensive plan, zoning and DRI and sector plan approvals, community development districts, underground storage tanks, indoor air quality and solid and hazardous waste, involving all state and federal environmental regulatory agencies and the Florida Legislature. www.bipc.com

[CAMERON-COLE LLC](#) is a sustainability and environmental services firm established in 2001. With offices nationwide including two locations in Florida, Cameron-Cole provides environmental services to a diverse array of governmental and private-sector clients that include petrochemical, oil and gas, manufacturing, waste management, property development, railroad, and construction industry leaders. Our team is focused on solving the dynamic array of investigative, compliance, and remedial challenges facing industry today, and into the future. Cameron-Cole's Sustainability Services practice is

a recognized leader in the field offering insights into reliable sustainable performance improvements derived from our years of experience successfully addressing the most complex environmental challenges faced by our clients.

[CDM SMITH](#) is a consulting, engineering, construction, and operations firm delivering exceptional service to public and private clients worldwide. An employee-owned corporation with a multidisciplinary staff of nearly 4,800 employees in more than 130 offices around the world, we offer a full range of services in water, environment, transportation, energy, and facilities and maintains the size, stability, and resources required to successfully undertake a diverse range of projects. We have been successfully assisting clients nationally for 71 years, and locally in Florida for more than 44, and we are among the country's premier consulting engineering firms. Of all the environmental firms in the country, CDM Smith was ranked 7th in the top 20 in water, 6th in sewer & waste, 23rd in the top 500 design firms, 7th in Top 20 wastewater treatment, and 10th in Top 20 water treatment/supply by Engineering News-Record in 2018.

[DAWSON & ASSOCIATES](#) is the nation's premier firm for resolving complex challenges involving Federal water resources and environmental regulatory policy and procedures. Founded in 1997, D&A provides a powerful voice for its clients in the Federal environmental regulatory process working with our clients to analyze a situation, assess the risk, identify goals, and anticipate future challenges. We have a successful track record of developing innovative solutions tailored to the specific needs of our clients. D&As' decades of successful leadership in the U.S. Army Corps of Engineers, the EPA, the Department of the Interior, the United States Congress, and the Office of Management and Budget produce unmatched knowledge, experience and relationships. Our experienced leaders work closely with clients to develop and implement a timely, effective government relations strategy. Our approach, whether in the legislative process or through Executive Branch action or both, is to help shape winning strategies for our clients that include reaching decision makers and articulating a compelling, timely message. At D&A, we recognize the importance of professional advocacy to help citizens participate in the governing process and to provide the compelling technically-based rationale needed to prevail. For more information, please call 202-289-2060 or visit us at www.dawsonassociates.com.

[DEAN MEAD](#) is a business law firm with 57 attorneys and three government relations professionals. The firm has five offices across Florida, including Orlando, Tallahassee, Fort Pierce, Viera and Stuart. Dean Mead serves clients by providing strategic solutions at the federal, state and local levels, and through extensive experience in numerous practice areas including: tax, estate and succession planning, business law, general commercial litigation, labor & employment, real estate, land use, zoning and permitting, agribusiness, government relations and lobbying, regulatory compliance, employee benefits, bankruptcy and creditors' rights, immigration, and eminent domain. Additionally, Dean Mead's Water Law Practice includes a seasoned team of attorneys with decades of experience in water resource management, protection, procurement, and planning. The team includes water resource and environmental litigators, counsel with decades of experience in rule development and rule challenges, administrative lawyers in several offices – including Tallahassee – and hands-on familiarity and experience with each of Florida's five water management districts. The firm's current clients own well over 1,000,000 acres throughout the state of Florida, and their combined agribusiness and water resource protection experience is unique among Florida's law firms. For more information, please call (877) 363-8992 or visit www.deanmead.com.

[DUKE ENERGY FLORIDA](#) owns and operates a diverse generation mix, including natural gas, coal and renewables, providing about 9,300 megawatts of owned electric capacity to approximately 1.8 million customers in a 13,000-square-mile service area. Duke Energy Florida is a subsidiary of Duke Energy (NYSE: DUK). Headquartered in Charlotte, N.C., Duke Energy is one of the largest energy holding companies in the U.S., with approximately 29,000 employees and a generating capacity of 49,500 megawatts. The company is transforming its customers' experience, modernizing its energy grid, generating cleaner energy and expanding its natural gas infrastructure to create a smarter energy future for the people and communities it serves. The company's Electric Utilities and Infrastructure unit serves approximately 7.6 million retail electric customers in six states – North Carolina, South Carolina,

Florida, Indiana, Ohio and Kentucky. Its Gas Utilities and Infrastructure unit distributes natural gas to approximately 1.6 million customers in five states – North Carolina, South Carolina, Tennessee, Ohio and Kentucky. Its Commercial Renewables unit operates a growing renewable energy portfolio across the U.S. A Fortune 125 company, Duke Energy was named to Fortune's 2018 "World's Most Admired Companies" list and Forbes' 2018 "America's Best Employers" list. More information about the company is available at <http://duke-energy.com>. The [Duke Energy News Center](#) includes news releases, fact sheets, photos, videos and other materials. Duke Energy's [illumination](#) features stories about people, innovations, community topics and environmental issues. Follow Duke Energy on [Twitter](#), [LinkedIn](#), [Instagram](#) and [Facebook](#).

[THE GOLDSTEIN ENVIRONMENTAL LAW FIRM, P.A.](#), is a boutique, environmental-only practice focusing on Brownfields reuse, economic incentives, legal liability management, and contaminated site investigation and cleanup. The Firm also provides environmental support to law firms, engineers, geologists, and consultants throughout Florida in connection with due diligence investigations, negotiation of regulatory agreements, and support of real estate transactions and corporate mergers and acquisitions. Areas of special emphasis include redevelopment of former gas stations, landfills, golf courses, nurseries, automotive dealerships, and agricultural sites and representation of big box retailers, affordable and workforce housing developers, lending institutions, and local governments. www.goldsteinenvlaw.com.

[GREEN ROCK](#) Based in Charleston (SC), Green Rock is a full service commercial and industrial waste management firm supporting clients across the country in an array of industries. From strategy and logistics to recycling and disposal, we exist to help you achieve your sustainability goals. Our approach is simple and effective. We leverage our relationships in the waste industry and knowledge of the markets to pull the right levers to achieve an environmentally sound, cost effective solution. We provide you with the environmental security and liability protection you demand at a lower cost, while adding more value through project management and professional oversight. Bringing decades of experience, agile methods and expansive industry expertise to every job, Green Rock works as an extension of your team to deliver effective and efficient solutions that meet your organization's unique waste management needs. www.greenrockllc.com

At [HDR](#) we believe that the way we work can add meaning and value to the world. That ideas inspire positive change. That coloring outside the lines can illuminate fresh perspectives. And that small details yield important realizations. Above all, we believe that collaboration is the best way forward. We specialize in engineering, architecture, environmental, and construction services. While we are most well-known for adding beauty and structure to communities through high-performance buildings and smart infrastructure, we provide much more than that. We create an unshakable foundation for progress because our multidisciplinary teams also include scientists, economists, builders, analysts, and artists. Our employees, working in more than 200 locations around the world, push open the doors to what's possible each and every day. *Environmental Sciences and Planning* – It takes the right experts, tools, and integrated approach to drive sustainable growth. With more than 1,000 environmental professionals, we deliver high-performance built environments that value the natural, economic, and human considerations. Our No. 2 environmental sciences ranking (*Engineering News-Record*) stems from providing clients with credible and defensible solutions for their facility and infrastructure projects. www.hdrinc.com

[JACOBS ENGINEERING GROUP](#) At Jacobs, we're challenging today to reinvent tomorrow by solving the world's most critical problems for thriving cities, resilient environments, mission-critical outcomes, operational advancement, scientific discovery and cutting-edge manufacturing, turning abstract ideas into realities that transform the world for good. With \$13 billion in revenue and a talent force of more than 55,000, Jacobs provides a full spectrum of professional services including consulting, technical, scientific and project delivery for the government and private sector. Engineering News-Record ranked Jacobs No. 1 in its list of Top 500 Design Firms in the world in 2021. We've held a top five position in the Top 500 list since ENR's rankings began in 2003, and for a fourth consecutive year, we're excited to be at the top spot. And, we also secured top spots in 20 ENR market sectors, spanning General

Buildings, Transportation, Environment, Manufacturing and Telecom. As the No. 2 Water Supply and Water Treatment and recipient of the 2015 the Stockholm Industry Water Award for leadership in potable reuse and public acceptance – we're excited about what we do, the projects we deliver, and how these projects are positively impacting communities around the world. Our integrated comprehensive services, which consider a triple-bottom-line focus and a One Water mentality, allow us to move complex water projects from concept to completion and operation – successfully delivering the right solutions for our clients. As a robust example of our innovative approach to One Water, the 4G [Wetland](#) is a multi-award-winning, 175-acre groundwater recharge wetland system – the largest of its kind in the world – designed to revitalize and restore the ecology of the Upper Floridan Aquifer, which supports more than \$7.5 billion in agriculture and provides drinking water to 10 million people. www.jacobs.com

[M.J. NICHOLS & ASSOCIATES, LLC](#) is an environmental and natural resource consulting services firm celebrating 20 years of experience providing quality solutions to the most challenging environmental issues facing land development projects. Our consulting firm has helped develop many hundreds of acres of residential, commercial, industrial and institutional projects throughout South Florida. We are environmental problem solvers with the expertise and experience to custom fit the solution to the job. Through innovative approaches to regulatory obstacles combined with an in-depth knowledge of the regulatory framework and South Florida geography, we consistently provide efficient outcomes that effectively reduce our clients' exposure, both in terms of time and money. Talk to us about your development project and see what we can do for you – visit <http://www.mjnicholsLLC.com>

[MOFFATT & NICHOL](#) is a leading global infrastructure advisor specializing in the planning, design and environmental permitting of facilities that shape our rivers, harbors and coastlines, and an innovator in transportation solutions associated with the movement of freight. With 34 office locations throughout North America, Latin America, Europe and the Pacific Rim, including 7 offices in Florida, Moffatt & Nichol provides clients worldwide customized service and a level of excellence in several primary practice areas – marine terminals; coasts, water, and the environment; waterfronts and marinas; transportation; inspection and rehabilitation; and energy. These areas of expertise are complemented by an in-house commercial consulting group with maritime and logistics analysts specializing in the acquisition and merger of marine infrastructure assets and intermodal transportation systems. Our engineers, environmental consultants, and other technical staff work hand-in-hand with each other and our public and private clients to implement projects with a wide range in size and complexity. For more information about the firm, please visit www.moffattnichol.com. To discuss your Florida planning, design and/or permitting needs, contact Christy Brush at cbrush@moffattnichol.com.

[NATIONAL STORMWATER TRUST, INC.](#) serves private and government customers by providing compensatory stormwater treatment capacity and all services related to stormwater infrastructure. Our team designs, builds, installs, operates, and maintains "Smart Pond" (CMAC) systems and stormwater facilities. NST has partnered with FDOT in an exclusive P3 agreement to utilize its stormwater facilities to offer treatment capacity throughout central Florida. Every day, our experienced team helps our customers increase the developable area of their real estate holdings, improve the quality of their stormwater discharges, and reduce flood risk with *Resilient Stormwater Solutions, Now!* For more information on how NST can deliver resilient stormwater solutions for you, visit nationalstormwater.com.

[SIDLEY AUSTIN LLP](#) is a premier global law firm with practices highly attuned to the ever-changing international landscape. The firm has built a reputation for being an adviser for multinational businesses, with more than 2,000 lawyers in 20 offices worldwide. We understand that increasingly complex legal needs require a deeply integrated and collaborative approach. We maintain a commitment to providing quality legal services and to offering advice in litigation, transactional and regulatory matters spanning virtually every area of law. Sidley's Environmental practice consists of more than 30 lawyers who are recognized for their success in handling the most complicated matters in environmental and natural resources laws. Our lawyers have handled virtually every kind of environmental challenge, from complex air, water, waste and climate change-related litigation and compliance matters to the environmental aspects of multijurisdictional business transactions. We work with clients to develop systems to identify and manage environmental, product supply chain and natural

resource issues before liabilities develop. The firm's lawyers have wide-reaching legal backgrounds and are dedicated to teamwork, collaboration and superior client service. Clients seek outside counsel who can provide the highest quality and greatest value in legal services. Sidley has consistently been recognized by numerous publications due to our presence in the marketplace. Our firm received 48 first-tier national rankings, the most of any U.S. law firm, in the 2018 U.S. News – Best Lawyers® “Best Law Firms” survey. We have received the most first-tier national rankings for seven of the past eight years.

[SWCA ENVIRONMENTAL CONSULTANTS \(SWCA\)](http://www.swca.com) was established in 1981 and has provided environmental planning, regulatory compliance, and natural and cultural resources management services to a variety of clients throughout the United States for 40 years. Originally founded by ecologist Dr. Steven W. Carothers on the principles of sound science and creative solutions for our clients, SWCA is a 100% employee-owned firm with 37 offices and more than 1,100 employees across the United States. With seven offices in the Gulf Coast region, including Pensacola and Fort Lauderdale, SWCA can pool resources and respond rapidly to our clients' needs while drawing on our local, regional, and national staff of scientists, planners, technical specialists, and subject matter experts across the country. <http://www.swca.com>

[TETRA TECH, INC.](http://www.tetrattech.com), established in 1966, is a full service engineering consulting firm. We offer proven experience and demonstrated expertise in Civil Engineering, Hydrogeology, Water and Wastewater Treatment, Stormwater Management, Survey, Mapping, GIS, Aviation, Transportation, Permitting and Construction Services. Tetra Tech has designed, permitted and constructed several large well fields and brackish groundwater reverse osmosis water treatment plants in Florida. Our award winning team has been recognized for innovation and dedication over the years, and we bring that perspective to each new project. Engineering News Record (ENR) has ranked Tetra Tech No. 1 in Water Treatment and Desalination, and No. 8 for Engineering Design Services. For more information, please visit our website at www.tetrattech.com

[WIREGRASS ECOLOGICAL ASSOCIATES \(WEA\)](http://www.wiregrasseecological.com) is a natural resources consulting firm committed to providing integrated solutions to complex environmental and ecological issues for our clients and customers. We specialize in project management of environmental evaluations, planning, permitting, management, and monitoring services for a variety of industries and market sector clients. WEA's technical service offerings reflect our multidisciplinary expertise and experience in biodiversity and conservation, threatened and endangered species, wildlife and fisheries, habitat enhancement and restoration, regulatory permitting and compliance, and geospatial technologies (including unmanned aerial systems [UAS]). We work closely with our clients to offer cost-effective and innovative solutions based on the objectives and constraints unique to each project. Our commitment to client and customer service exceeds industry standards and is exhibited through the expertise, experience, and responsiveness of our staff. www.wiregrasseecological.com

Obtaining Continuing Education Credits

FLORIDA BAR ASSOCIATION

The conference has qualified for 16 hours of general Continuing Legal Education (CLE) credits (Course #2103931N). Registered attendees of “Early Bird B” session can apply for an additional 5 hours of credit in ethics and technology, for a total of 20 hours.

Please note- Florida Bar members are responsible for processing your own CLE credits online following the instructions below:

1. Go to www.floridabar.org
2. Hover your mouse over “Member Services” on the right side of the web page
3. Click on “Post CLE,” listed under the “CLER/BCSR” sub-heading.

Once you have completed posting all of your credits, print the confirmation page for your records. If you have not yet set up a Florida Bar website login and password you will need to do so before you can apply for CLE credits. Follow the steps above and select “First time user? Setup for online access” (*please allow 5-7 business days for the Florida Bar to process your new account request.*)

FLORIDA BOARD OF PROFESSIONAL ENGINEERS

The Florida Environmental Network is an approved provider (0003339) of continuing education credits for registered engineers through the Florida Board of Professional Engineers. Engineers can receive 20 PDHs for Areas of Practice by attending the Summer School program. **Please obtain a form from the conference registration desk to receive this credit.** In addition, 1 PDH can be obtained for Ethics and 1 PDH for Laws and Rules if you attend Early Bird Session “A” on The Keys to Success for the Practicing Engineer. **A separate form will be required for these additional credits.**

Note- completed forms must be submitted prior to the end of the conference. Submitted forms will be processed following the conference and a Certificate of Completion will be mailed to you at the address listed on the form for your records. We do not directly report to the Board of Engineers. It is each engineers’ responsibility to keep their Certificate of Completion on file in the event of an audit by the Board of Engineers.

CERTIFIED ENVIRONMENTAL PROFESSIONALS

CEP Maintenance Hours Process

Before the end of each calendar year each CEP needs to:

- ✓ Go to abcep.org, click on the CEP Express tab, and log in
- ✓ Click on “Manage Hours” tab, and scroll down to the Hours Details table
- ✓ Add hours for your regular daytime work and for all your relevant extracurricular activities
- ✓ Check that you have at least 40 hours. If not, engage in one of the listed activities, or contact the ABCEP office for assistance.
- ✓ After you have completed entering your maintenance hours, certify that you have supporting documentation by adding your initials under the “Certification” column.
- ✓ Click on “Save Changes” on the top right side of the Hours Details table.

INTERNATIONAL SOCIETY OF TECHNICAL AND ENVIRONMENTAL PROFESSIONALS

This course has qualified for continuing education (CE) credits through the International Society of Technical and Environmental Professionals, Inc. (INSTEP). Credits apply to those currently registered by this association. Participants will receive 1 CE credit for every actual hour of instruction. LEP’s may enter their credits on the LEP Center Section of the INSTEP website.
